	IMAGE NOT DRAWN TO SCALE	

The Chromosome 10 Control Probe specifically hybridizes to the centromeric region of chromosome 10, and is labeled using fluorescence in situ hybridization in green, red, orange, gold or aqua. The Chromosome 10 Control Probe is ideal for enumerating chromosome 10 and when combined with a gene or region-specific probe, can act as a control.

Loci: 10p11-q11

Test Kits: 10

Turnaround Time: Generally within 24 hours

Shipping Time: 1-2 Day Expedited Shipping
