

SWIFTFISH

RAPID HYBRIDIZATION BUFFER

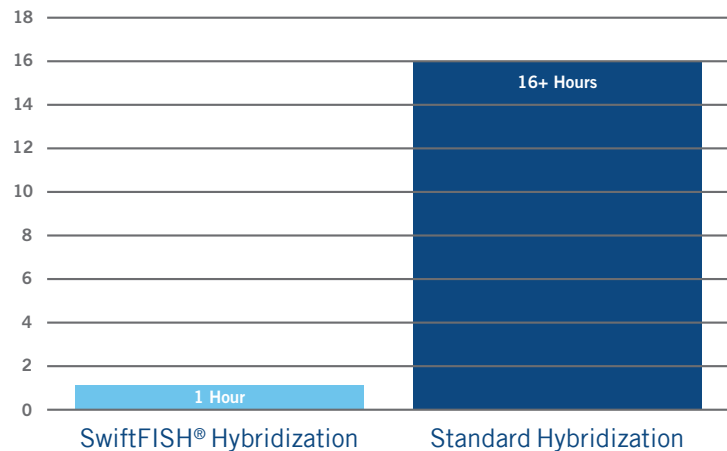

Reduce Your Hybridization Time to 1 Hour with No Loss of Intensity

Whether you're handling urgent oncology cases or developing a new drug, getting your results fast contributes to better patient care and helps you maximize your labs workflow. **Reduce your hybridization time from an overnight cycle to as little as one hour**, while maintaining the same level of precision and signal strength, with Empire Genomics SwiftFISH® rapid hybridization buffer. The SwiftFISH buffer has been tested on FFPE, Peripheral Blood, and Bone Marrow samples and is optimized to reduce signal background. The product is sold in a 200 µL vial (approximately 20 tests) and ships within 1 business day.

Benefits

- Decreased hybridization time
- No drop in signal intensity
- Streamline your labs workflow
- Easy to use protocol
- Use with any Empire Genomics probe

Typical Hybridization Time
